I know it's another stunning spring day in NYC but I have to take a moment to share my latest obsession. Leather dresses. Not the Lita Ford hair metal minis of yesteryear. These mod or edgy/sweet versions that I am seeing everywhere for FW12. Here are a few great examples I discovered by [Max Fowles](#) while visiting my friends at [Bollare](#) recently. I am completely smitten with the tailoring and details in the latest collection as well as the gorgeous emerald green dress with leather trimmed pockets.

I am happy to be here in the now but it is nice to envision the outfits of fall. What fashion trends to you day dream about?
